JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 10, Number 1 January-February, 1969

CONTENTS

	Eng./Russ.	
EHD Flows at Large Electric Reynolds Numbers—V. V. Gogosov, V. A. Polyanskii, I. P. Semenova, and A. E. Yakubenko	1	3
Approximate Solution of the Boundary Problem for the Equations of a Stationary Electrostatic Charged-Particle Beam—V. N. Danilov and V. A. Syrovoi	8	11
Lyapunov-Stable Equilibrium Distribution of Charged Particles in an Ionized-Gas Cloud—S. V. Temko	17	20
Nonequilibrium Radiation of a Strong Shock Wave—A. D. Nadezhin and E. A. Romishevskii	24	27
Propagation of Discontinuity Waves in Complex Rheological Media with Viscous Properties—A. D. Chernyshov	30	33
Minimizing the Thickness of an Inhomogeneous Layer at a Given Reflection Coefficient for a Monochromatic Wave—K. A. Lur'e and M. M. Machevariani	40	44
Calculation of Effective Elastic Moduli Composite Materials with Multiphase Interaction Taken into Consideration—A. G. Fokin and T. D. Shermergor	48	51
A Statistical Model of Linear Polymers in the Amorphous State —Yu. A. Buevich	55	58
Theory of Dynamic Deformations of Crystal Lattices—A. N. Luzin and A. V. Popov	72	75
Operational States of an Ideal-Displacement Chemical Reactor with Integral Heat Release—Yu. P. Gupalo and Yu. S. Ryazantsev	78	82
Critical Heat Fluxes in Boiling of Liquid Nitrogen Underheated to Saturation Point in Forced-Flow Conditions—S. N. Verkhman	85	90
Surface Tension of Freons—A. R. Dorokhov, A. A. Kiriyanenko, and A. N. Solov'ev	89	93
Interaction between Acoustic Waves and the Burning Surface of Solid Propellants at Elevated Temperatures—V. P. Volkov and Yu. I. Medvedev	93	96
Determination of Stresses behind a Shock Wave Front in Snow Powder Avalanche with Allowance for the Firmness of the Solid Phase—I. E. Shurova and Yu. L. Yakimov	98	100
Quantitative Studies of Shock-Wave Processes Behind a Shock Wave with the Aid of Shadow Methods—V. A. Emel'yanov and I. V. Ershov	100	101
Surface Waves in an Elastic Half-Space in an Electric Field—I. V. Ioffe and A. I. Saet	104	104
Relaxation Equation for the Vibrational Energy of the Molecules in the Gas behind an Intense Shock Front—B. V. Kuksenko, S. A. Losev, and O. P. Shatalov	106	106
Explanation of the Toms Effect in Terms of the Viscosity Anisotropy of the Solution—G. F. Kobets	108	107
Displacement in the Turbulent Boundary Layer on a Permeable Plate with Supercritical Injection—S. A. Druzhinin, A. A. Zelengur, V. N. Mamonov, and B. P. Mironov	113	112

CONTENTS

(continued)

	Engl.	Russ.
Study of Mass Transfer in a System of Gas Bubbles and a Liquid—I. V. Belov and E. V. Prokolov	119	116
Effect of Heat Load on Heat Transfer in a Foam Layer—A. N. Khoze and Yu. I. Sharov	126	122
Diffusion of Superintense Pulsed Magnetic Fields—V. V. Semchenko and A. V. Stepanov	129	124
Calculating the Gasdynamic and Electric Parameters of Two-Dimensional Low-Temperature Plasma Flow in Coaxial MGD Channel—I. V. Vysotskaya, A. V. Grishin, and V. V. Dodotchenko	136	129
Electric Arc in Hydrogen Flow at High Pressure—V. N. Vetlutskii and V. G. Sevast'yanenko	143	136
Theory of Ideal Electric Arc in Coaxial Plasmatron with Axial Magnetic Field in the Presence of Gas Flow—B. A. Uryukov	147	138
Model of Linear Displacement of Water by Oil from a Porous Medium Specimen —Yu. A. Afinogenov and V. I. Pen'kovskii	153	144
Nonstationary Heat Transfer Associated with Borehole Washing—I. M. Astrakhan and V. I. Maron	158	148

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 10, Number 2 March-April, 1969

CONTENTS

	Eng.	Russ.
Pelageya Yakovlevna Kochina: a 70-th Birthday Tribute	165	3
Solution of Nonlinear Heat-Conduction Problems in a Medium with Phase Transitions—F. L. Chernous'ko	167	6
Propagation of Magnetoelastic Stress Waves from a Cylindrical Cavity in a Conducting Medium—I. T. Selezov	176	15
Wave Propagation on the Surface of a Heavy Liquid in a Basin with Uneven Bottom—E. I. Bichenkov and R. M. Garipov	181	21
The Routh Function of a Slender Plasma Filament—M. G. Nikulin	187	27
Mixed Spatial Gas Flows in a Longitudinal Magnetic Field—V. B. Gorskii	194	34
Stability of Piston Flow Motion in a Traveling Magnetic Field—K. I. Kim	198	38
Temperature and Relaxation Difference for a Magnetically Active Plasma in the Quasi-Linear Approximation Taking Collisions into Account—G. Z. Machabeli	208	47
Investigation of Pulsed Discharges in a Dielectric Channel with Ablating Walls—Yu. P. Rylov, Yu. F. Tainov, and V. P. Chikov	213	52
Diamagnetism of Conductors Moving in a Magnetic Field—G. V. Fedorovich	218	55
Steady-State Distribution of Charged Particles in the Diffusion Approximation—A. F. Aleksandrov, S. S. Ambaryan, V. E. Mitsuk, and V. A. Pogosyan	226	62
Investigation of the Electrical Breakdown of a Plasma-Cold Electrode Gap—G. Yu. Dautov, M. F. Zhukov, G. M. Mustafin, and A. N. Timoshevskii	232	67
The Thermophysical Properties of the Medium at the Center of an Electrical Explosion in Relation to the Parameters of the Crater—I. L. Zel'manov, A. I. Kanunov, V. I. Kulikov, V. A. Naidenov, and A. M. Tikhomirov	240	73
Experimental Investigation of Expansion following the Passage of a Powerful Shock Wave—M. M. Rusakov	244	77
Detonation of Elongated Charges with Cavities—A. S. Zagumennov, N. S. Titova, Yu. I. Fadeenko, and V. P. Chistyakov	246	79
Density Dependence of the Critical Diameter and Detonation Velocity of Explosive Charges—G. G. Rempel'	251	83
Emissivities and Spectral Absorptivities of Combustion Products—Yu. A. Plastinin	255	86
Analysis of Propellant Quenching Conditions—S. S. Novikov and Yu. S. Ryazantsev	262	93
Stationary Operating Regimes of Chemical Reactors—É. A. Chernova	267	97
Approximate Determination of the Shock-Adiabat Exponent for Motion of Large Meteoric Bodies in the Atmosphere—A. K. Stanyukovich	275	104
Glow Discharge Measurement of Gas Density in Supersonic Rarefied Flow—V. M. Kalugin	277	106
Structure of Weak Shock Waves in Relaxing Media—G. M. Arutyunyan	282	110

CONTENTS

(continued)

	Engl./Russ.
Group Properties of the Equations of Adiabatic Motion of a Medium in Relativistic Hydrodynamics—M. T. Zhumartbaev	289 116
Binary Laminar Boundary Layer on a Vertical Surface in the Presence of Combined Free and Forced Convection—P. M. Brdlik and V. I. Dubovik	295 120
Mach Reflection Parameters for Plexiglas Cylinders—G. A. Adadurov, A. N. Dremin, and G. I. Kanel'	302 126
Stability and Buckling of Heterogeneous Columns Beyond the Elasticity Limit —I. T. Vokhmyanin and Yu. V. Nemirovskii	306 129
Dependence of the Yield Stresses of Certain Materials on Loading Rate—Yu. A. Belyaev, A. F. Mel'shanov, and Yu. V. Suvorova	313 136
Plastic Flow for Axisymmetric-Tension Specimens with Necking—V. M. Segal	319 141
Comparison of Two Linear Models of Soil Moisture Dynamics—V. A. Yangarber	323 145
One-Dimensional Problem of the Solution and Leaching of Salts at High Values of the Peclet Number—V. I. Pen'kovskii	327 148

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 10, Number 3 May-June, 1969

CONTENTS

	Eng./Russ.	
Theory of Gravitational Stability of a Rotating Cylinder—G. S. Bisnovatyi-Kogan, Ya. B. Zel'dovich, R. Z. Sagdeev, and A. M. Fridman	333	3
Energy Transfer by Spectral-Line Radiation—Yu. D. Shmyglevskii	342	12
Self-Similar Electrical Skin Explosion of a Conductor—E. I. Bichenkov and A. E. Voitenko	350	21
Oblique Incidence of an Electromagnetic Wave on a Parabolic Plasma Layer —V. R. Smilyanski	356	27
Self-Similar Solution of the Navier-Stokes Equations for a Completely Ionized Hydrogen Plasma (the Plane Piston Problem)—R. G. Luk'yanova and S. I. Fadeev	362	34
Boundary Layer of Two-Temperature Plasma on Electrodes of MHD Channel with Crossed Electric and Magnetic Fields for Large Values of the Hall Parameter—L. E. Kalikhman	367	40
Ion Distribution Function at the Boundary with an Electrode—I. P. Stakhanov and P. P. Shcherbinin	374	47
Nonlinear Electric Field Oscillations in Continuous Media—Yu. P. Emets and I. I. Repa	381	55
Dynamic Relations for a Moving Phase Interface—M. K. Likht and V. A. Shteinberg	384	58
Calculation of Supercavitational Flow Past Slender Profiles in Proximity to the Separation Boundary—I. I. Efremov and V. M. Roman	390	65
Some Plane Adiabatic Ideal Gas Flows Containing Shocks—M. D. Ustinov	396	71
The Problem of a Dihedral Piston—V. M. Teshukov	399	74
Hydrodynamic Analysis of Shock Adiabats of Heterogeneous Mixtures of Substances —V. N. Nikolaevskii	406	82
Effect of Surface Tension on the Onset of Convection in a Layer of Liquid with a Free Surface—V. Kh. Izakson	412	89
Analysis of the Film Condensation Process of Vapor on a Vertical Finely Serrated Surface—N. V. Zozulya and V. A. Karkhu	416	93
The Stationary Operation Modes of a Continuous Isothermal Chemical Reaction —Yu. P. Gupalo and Yu. S. Ryazantsev	421	97
Thermodynamic Properties of Nitrogen at High Pressures—A. A. Antanovich, M. A. Plotnikov, and G. Ya. Savel'ev	423	99
Gas Flow in Nucleporous Filters—A. A. Kirsh and K. R. Spurny	433	109
Experimental Investigation of Heat Transfer in Turbulent Flow of Air in a Circular Tube with Large Temperature Drop and Cooling of the Air —V. I. Rozhdestvenskii	436	112
Some Regularities of the Turbulent Pressure Field in the Boundary Layer on a Flat Plate—A. V. Smol'yakov	440	116

CONTENTS

(continued)

	Engl.	Russ.
Calculation of the Turbulent Characteristics of Channel Flow with Rotating Inner Cylinder—B. P. Ustimenko	445	121
Influence of the Distribution of Suction on the Structure of the Turbulent Boundary Layer —Rafaél M. Garipov and V. A. Tétyanko	452	127
Simple-Wave-Type Solutions of the Equations of Two-Dimensional Gasdynamics —V. M. Men'shikov	455	129
Characteristics of a Vortex-Stabilized Plasma Generator at Reduced Pressure —A. K. Rebrov and V. N. Yarygin	461	135
Deceleration of a Plasmoid in a Nonuniform Magnetic Field—Yu. F. Kashkin	464	138
Obtaining High Gas Temperatures in an Electrodeless High-Frequency Discharge (Review)—M. I. Yakushin	470	143
Investigation of the Mechanism of Destruction of Certain Polymers by a Plasma Radiant Flux—I. K. Dustov and M. A. Sultanov	479	151
Measurement of the Thermal Diffusivity of Metals on the Temperature Interval 1100-2500°K—A. A. Emel'yanov, O. A. Kraev, A. A. Stel'makh, and R. A. Fomin	482	154
Effect of Strain Rate on the Compressibility and Shear of Sands and Clays Subjected to Short-Duration Dynamic Loads—G. V. Rykov	484	155
Parameters of Shock Waves Created by Exploding Horizontal Cylindrical Charges in a Loam—A. A. Vovk, V. I. Kononenko, I.A. Luchko, and V. A. Plaksii	490	161
Effect of Static Pressure on the Motion of Sand Following an Explosion—O. S. Kolkov, V. I. Kulikov, A. M. Tikhomirov, and A. F. Shatsukevich	495	165
Motion of a Crack at Constant Velocity—P. A. Martynyuk and V. F. Tarasov	499	168
Generation of the Beam Approach to Problems of Crack Theory—A. M. Mikhailov	503	171
Energy Condition at the End of a Nonstationary Crack—E. N. Sher	507	175
Experimental Investigation of the Effect of Short-Term Plastic Deformation on the Transient Creep Rate of a Titanium Alloy VT-6 in Uniaxial Tension —Yu. P. Kaptelin	512	179
Equation of Creep of Materials Liable to Strain-Harden During Creep —A. F. Nikitenko	517	183

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 10, Number 4 July-August, 1969

CONTENTS

	Eng./Russ.	
Transverse and Longitudinal Edge Effects in a Rectangular MHD Channel —N. G. Nemkova	521	3
Theory of Equilibrium and Stability of High-Current Discharge in Low-Conductivity Plasma—A. A. Rukhadze and S. A. Triger	531	14
Expansion of Partially Ionized Argon through a Supersonic Nozzle—G. I. Kozlov, D. I. Roitenburg, and E. L. Stupitskii	538	22
Two-Velocity Theory of Flow Past Slender Profile—Kh. A. Rakhmatulin and N. A. Mamadaliev	547	32
Mass Transfer in a Two-Layer Porous Medium—A. A. Roshal'	551	36
Plane Waves in Nonhomogeneous Plastic Media and Their Interaction with Obstacles —G. M. Lyakhov, R. A. Osadchenko, and N. I. Polyakova	559	44
Study of Flow Dynamics by Optical-Correlation Method—N. F. Derevyanko and A. M. Trokhan	567	52
Method of Outer and Inner Asymptotic Expansions in the Theory of Brownian Motion of Aerosol Particles—V. M. Voloshchuk	576	61
Some Invariant Solutions of Korteweg-de Vries Equations—V. M. Kostin	583	69
General Stability Criterion for Laminar Tube Flow—R. S. Kuznetskii and M. K. Likht	587	74
A Solution of the Diffusion Equation with Nonlinear Right-Hand Side—N. N. Kochina	594	80
Uniqueness and Stability of Steady States of Continuous Chemical Reactors —Yu. P. Gupalo and Yu. S. Ryazantsev	600	86
Electromagnetic Disturbance Created by an Expanding Conducting Cylinder in a Magnetic Field—V. K. Bodulinskii and Yu. A. Medvedev	605	91
A Semiconductor Pressure Transducer for Measurement of Strong Shock Waves ($\geq 10^3$ atm) in Liquid—V. K. Kedrinskii, R. I. Soloukhin, and S. V. Stebnovskii	607	92
Compression Shock in a Two-Phase Medium—L. M. Zolotarev and I. D. Samsonov	611	95
Structure of Oblique Shock Wave at High Mach Numbers—Yu. A. Berezin, G. I. Dudnikova, V. G. Eselevich, and R. Kh. Kurtmullaev	617	100
Results of Interferometer Study of Laval Nozzle—K. K. Kim and D. D. Tomilin	623	105
Determining the Radius of an Air Vortex in a Centrifugal Ejector—M. A. Gol'dshtik, G. P. Zykin, Yu. I. Petukhov, and V. N. Sorokin	626	107
Experimental Study of the Turbulent Boundary Layer on a Smooth Flat Plate with Stepwise Heat Addition—V. P. Lebedev	631	112
Numerical Analysis of Plane Poiseuille Flow Stability—V. A. Sapozhnikov and V. N. Shtern	635	115
Calculation of Cavity Flows in an Axisymmetric Channel—V. N. Shepelenko	638	118
A Model of Cavitational Flows for Initial Stages of Cavitation—L. A. Galin, V. G. Markov, and A. P. Frolov	641	119
Heat Transfer of Rectangular Element in Froth Layer—A. G. Beinusov, S. A. Ryvkin, and A. N. Khoze	647	125

CONTENTS

(continued)

	Engl./Russ.
Expansion Isentropes of the Explosion Products of Condensed Explosives —M. V. Zhernokletov, V. N. Zubarev, and G. S. Telegin	650 127
Critical Diameter of Liquid Explosives as a Function of Powder Content —R. Kh. Kurbangalina	656 133
Generalized Shock Hugoniot of Condensed Substances—A. N. Afanasenkov, V. M. Bogomolov, and I. M. Voskoboinikov	660 137
Effect of Inhomogeneities in an Explosive on the Critical Detonation Diameter —S. S. Rybanin	665 141
Point Explosion in an Ideally Brittle Body—G. P. Cherepanov	669 145
Shock Compressibility of Polystyrene of Variable Initial Density—I. P. Dudoladov, V. I. Rakitin, Yu. N. Sutulov, and G. S. Telegin	673 148
Effect of the Variability of the Modulus of Elasticity on the Thermoelastic Stresses Associated with the Pulsed Heating of a Rod—V. M. Kul'gavchuk and A. A. Uchaev	677 152
Experimental Investigation of the Growth of an Isolated Crack—V. M. Kuznetsov, P. A. Martynyuk and A. I. Potylitsyn	682 155

The Russian press date (podpisano k pechati) of this issue was 8/29/1969. Publication therefore did not occur prior to this date, but must be assumed to have taken place reasonably soon thereafter.

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

A translation of *Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki*

Volume 10, Number 5 September-October, 1969

CONTENTS

	Eng./Russ.
Anode Electrical Layer in Discharge with Closed Hall Current—V. S. Erofeev, Yu. V. Sanochkin, and S. S. Filippov	689 3
Entrainment of Ferromagnetic Suspension by a Rotating Field—V. M. Zaitsev and M. I. Shliomis	696 11
Experimental Study of Explosion Caused by Focusing Monopulse Laser Radiation in Water—A. A. Buzukov, Yu. A. Popov, and V. S. Teslenko	701 17
Point Explosion in Nonuniform Atmosphere—Kh. S. Kestenboim, F. D. Turetskaya, and L. A. Chudov	709 25
Acoustic Conductance of Burning Propellant Surface—S. S. Novikov, Yu. S. Ryazantsev, and V. E. Tul'skikh	713 29
Calculation of Transient Combustion Regimes for Solid Propellant in a Channel —V. B. Librovich and G. M. Makhviladze	717 33
Establishment of Steady Flame Propagation When Igniting a Gas by a Heated Surface —A. G. Merzhanov, B. I. Khaikin, and K. G. Shkadinskii	725 42
Structure of Equilibrium Pseudoturbulence in Gaseous Suspensions in Conditions of Local Nonhomogeneity—Yu. A. Buevich and V. G. Markov	731 49
Hypersonic Spherical Expansion of a Gas with Stationary Shock Wave —A. A. Bochkarev, A. K. Rebrov, and S. F. Chekmarev	742 62
Natural Oscillations of Gas Flowing Past a Lattice of Flat Plates—V. B. Kurzin	747 68
Jet Flow around a Sphere—T. A. Vil'gel'mi	754 76
Plasticity (Strength) Condition for a Reinforced Layer—Yu. V. Nemirovskii	759 81
Polarization Optical Studies at Large Strains—A. Ya. Aleksandrov, M. Kh. Akhmetzyanov, G. N. Albaut, and V. N. Baryshnikov	766 89
Limiting Equilibrium of Compressed Plate Weakened by Circular Hole and Cracks Extending to Its Edge—Yu. V. Zaitsev	775 100
Influence of Third Stress Deviator Invariant on Creep of Nonhardening Materials —A. F. Nikitenko	777 102
On the Steady Regime of an Hereditarily Elastic Oscillator—S. I. Meshkov	780 104
Study of High-Velocity Body Impact in a Light Porous Material—G. V. Pryakhin and V. M. Titov	786 110
Nonlocally Elastic Filtration Regime and Pressure Recovery in Deep Formations —E. F. Afanas'ev and V. N. Nikolaevskii	789 113
Stability of Plane Couette Flow—V. N. Shtern	793 117
Electrochemical Measurement of Friction in Two-Phase Flows—V. A. Kuz'min, and B. G. Pokusaev	797 120
Calculation of Cylindrical Detonation Wave Expanding from Line of Explosion —N. V. Banichuk	801 123
Experimental Detection of Sound Dispersion near Critical Point—S. G. Komarov and E. P. Sheludyakov	803 124

CONTENTS

(continued)

	Engl.	Russ.
Measuring Local Velocities of Small-Scale Flows using a Laser—I. V. Lebedev, B. S. Rinkevichyus, and E. V. Yastrebova	805	125
Algorithms for Modeling the Random Wavelength of Compton γ-Particle Scattering—O. S. Marenkov	808	128
Reflection of Magnetoacoustic Waves from an Elastic Layer with Finite Electric Conductivity—L. Ya. Kosachevskii and V. G. Ponomarenko	810	129
Conducting Liquid Flow through a Channel in a Nonuniform Magnetic Field —A. S. Gorinov	814	134
Estimate of Thermoelectric Effects in the Electrode Region of a Gas Discharge —A. E. Konovalov	819	138
Low-Frequency Oscillations of Plasma Rotating in a Magnetic Field—V. G. Andropov, G. S. Lopatskii, G. D. Petrov, V. I. Chernysh, and É. F. Yurchuk	822	141
Particular Solutions of Unsteady MHD Equations with Account for Thermal Conductivity for Finite Magnetic Reynolds Numbers—A. N. Cherepanov and V. I. Yakovlev	825	143
Technique for Measuring Heat Quantity and Heat Release Kinetics in a Condensed Phase —V. V. Aleksandrov, V. G. Morozov, and S. S. Khlevnoi	830	149
Free Convective Heat Exchange with Sulfur Hexafluoride in the Supercritical Region —É. N. Dubrovina and V. P. Skripov	834	152
Effect of Gas on Surface Tension of Potassium—A. A. Kiriyanenko and A. N. Solov'ev	838	156

JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS

Volume 10, Number 6 November-December, 1969

CONTENTS

	Eng./Russ.	
Numerical Calculation of Motion and Laser Radiation Heating of Plasma Formed during Absorption Burst in Vapors of a Solid Body—G. G. Vilenskaya and I. V. Nemchinov	843	3
Numerical Experiment of Self-Focusing of Electromagnetic Waves in a Nonlinear Medium—V. V. Sobolev and V. S. Synakh	858	20
Dissipative Spectral Transfers of Turbulent Plasma Pulsations—V. G. Makhan'kov and V. N. Tsytovich	861	23
Integral Characteristics of MHD Channel with Nonconducting Baffles —I. V. Lavrent'ev	867	30
Generation of Higher Electron Cyclotron Frequency Harmonics in Plasma with a Beam—M. A. Livshits	875	40
Laminar Boundary Layer Stability on Membrane Type Deformable Surfaces —V. V. Skripachev	886	52
Shock Wave Incidence on a V-Shaped Cavity—S. K. Godunov, Ya. M. Kazhdan, and V. A. Simonov	891	57
Some Families of Exact Solutions of the Equations of Two-Dimensional Shallow Water Theory—M. T. Gladyshev	896	62
Hydrodynamics of Homogeneous Suspensions—Yu. A. Buevich	906	72
Elastoplastic Behavior of a Reinforced Layer—Yu. V. Nemirovskii	914	81
Brittle Strength of Vessels under Pressure—G. P. Cherepanov	922	90
Electromagnetic Disturbance Caused by Expanding Ideally Conducting Sphere in a Magnetic Field—V. K. Bodulinskii and Yu. A. Medvedev	932	102
Some Parameters of Plasma Blob Generated by Conical Theta Pinch —N. I. Alinovskii, A. N. Papyrin, B. K. Pakhtusov, and A. G. Ponomarenko	936	105
Structure of Low-Density Supersonic Jet—V. I. Nemchenko and N. I. Yushchenkova	941	110
Interaction of Spherical Shock Wave with Bodies—A. N. Ivanov and S. Yu. Chernyavskii	946	115
Solution of Unsteady Problem of Mechanical Vibrations of One-Dimensional Chain of Elastically Coupled Particles in the Presence of an Isobaric Defect —V. V. Mazhuga	951	120
Study of Disturbance Front Propagation in Multilayered Medium—M. A. Guliev	956	124
Density of Fusible Metals Passing through the Melting Point—A. S. Basin, S. P. Volchkova, and A. N. Solov'ev	961	128
Correlation of First and Second Filtration Phases in Porous-Fractured Reservoir —R. I. Medvedskii	967	134
Fluid Leakage from Nonuniformly Permeable Porous Reservoir through a Relatively Impermeable Barrier—V. D. Alferov	974	139
Comment on "Field Distribution Along a Longitudinally Streamlined ARC in DC Plasmatron"—A. S. Vasil'kovskaya, L. I. Kolonina, A. D. Lebedev, and V. Ya. Smolyakov	978	143
